STANDARD OPERATING PROCEDURE

Dodo Routes: making the daily driver sheets

Two files in, one route sheet per driver out, with the right stop order, parcels, instructions and pay. About **5 minutes a day**.

Open the tool here: **https://dodo-routes-3vpx20tnea.netlify.app**

Bookmark it. Works in Chrome or Edge on any laptop. Keep this link inside the team.

Version 3.0 · 3 November 2026 · Owner: Ops (Rasiq) · Screenshots use made-up sample data

The whole job on one page

Do these 6 things, in this order, every day.

1 Open the link

Go to the Dodo Routes link. First time only: type your name and press **Continue**.

2 Download 2 files

From **Tookan**: the **route export** CSV.
From **Retool**: the **order export** CSV.

3 Drop both files in

Drag each file onto its box. Both boxes turn **green** ✔.

4 Read the coloured box

Green = all good, go on.
Red = stop, fix what it lists first.

5 Add extras (if any)

Click the driver, then **Adjust pay**. Type the £ and a reason.

6 Print & send

Print driver sheets → Save as PDF → send to drivers.
Then **Send to Google Sheets**.

Golden rules

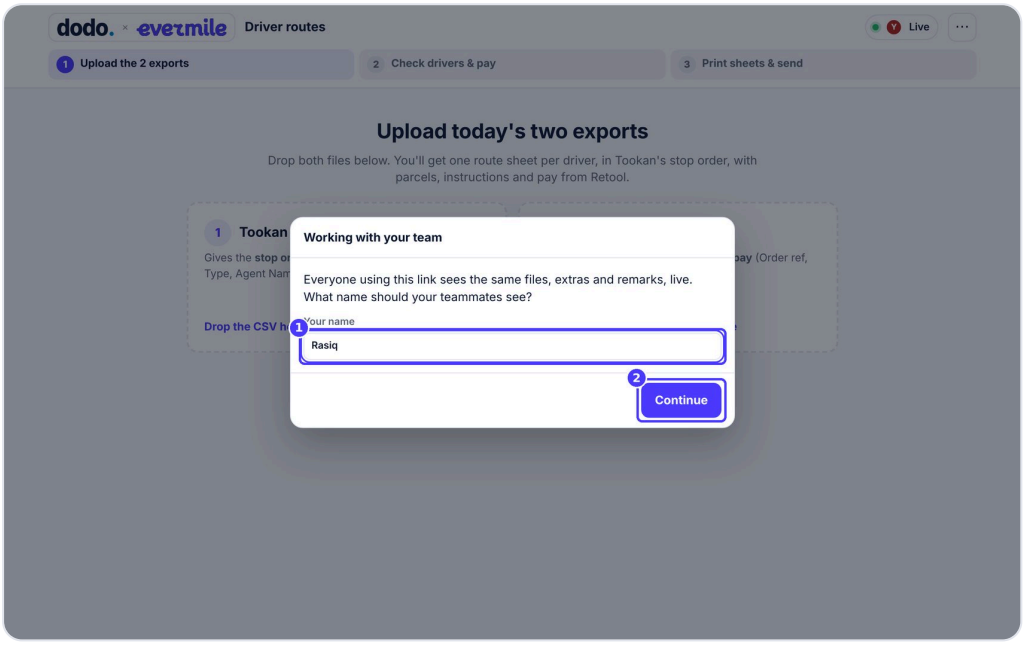

- ✔ Always upload **both** files: Tookan *and* Retool. One is not enough.
- ✔ If the box is **red**, **do not print yet**. A red box means a stop may be missing from a driver's sheet.
- ✔ Every extra or deduction needs a **reason** in the Remark box.
- ✔ Deductions are typed with a **minus**: `-2` takes £2 off.
- ✖ Don't share the link outside the team. It shows customer names and addresses.
- ✖ Don't use **Start a new day** until everyone is finished. It clears the screen for the **whole team**.

🎬 Prefer watching?
Open **dodo-routes-walkthrough.gif** (sent with this SOP) for a 10-second animation of steps 1–5.

0 First time only: say who you are

You do this once per laptop. Takes 10 seconds.

1. Open **https://dodo-routes-3vpx20tnea.netlify.app** in Chrome.
2. A box asks for your name. Type your first name.
3. Press **Continue**. Done. You'll never be asked again on this laptop.

① type your name · ② press Continue

Why?

Your teammates see your name next to the changes you make, e.g. *"Edited by Rasiq"*.

You're connected when...

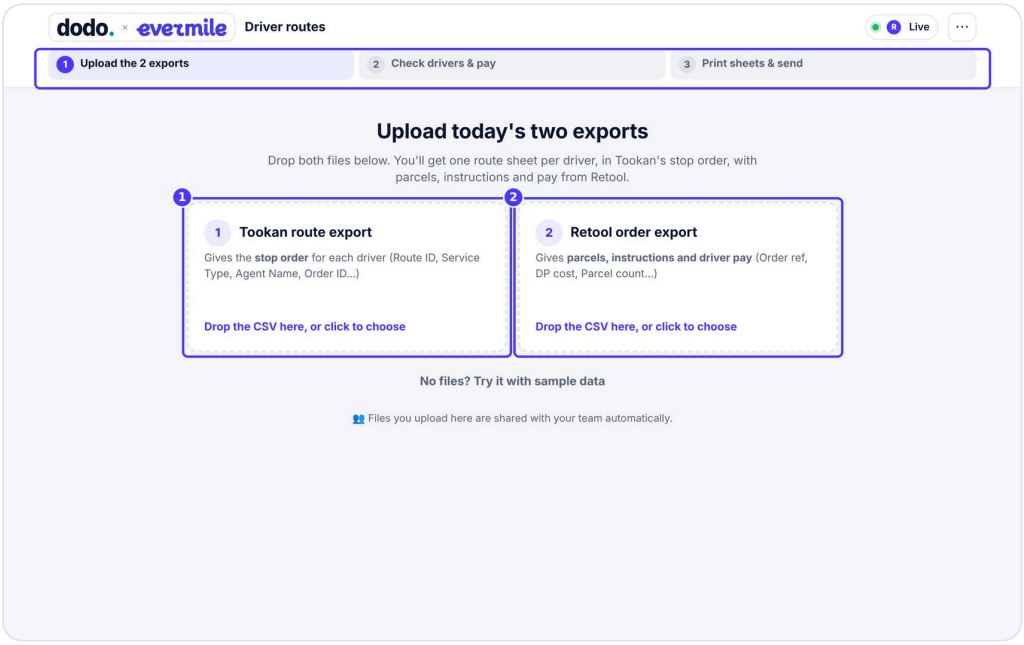

the top-right corner shows a **green dot** and the word **Live**. If you see "Can't reach team", check your internet, then refresh the page.

1 Get today's two files and drop them in

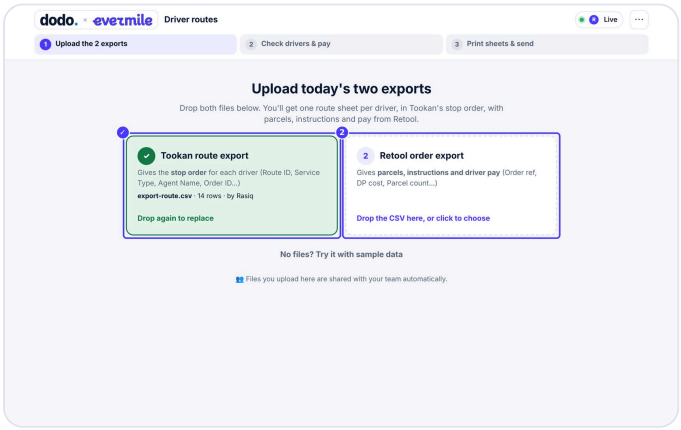

The tool needs both. Each one tells it something different.

FILE	WHERE FROM	WHAT IT GIVES THE TOOL
Tookan route export e.g. export-route.csv	Tookan → routes → download/export CSV for today	The **order of stops** for each driver (pickups and deliveries).
Retool order export e.g. export.csv	Retool → today's orders → export CSV	**Parcels**, **delivery instructions** and **driver pay** (DP cost).

1. Drag the **Tookan** file onto box **1**, or click the box and pick the file.
2. Drag the **Retool** file onto box **2**.
3. That's it. The driver list appears straight away.

① Tookan box · ② Retool box. The bar at the top shows where you are: 1 Upload → 2 Check → 3 Print.

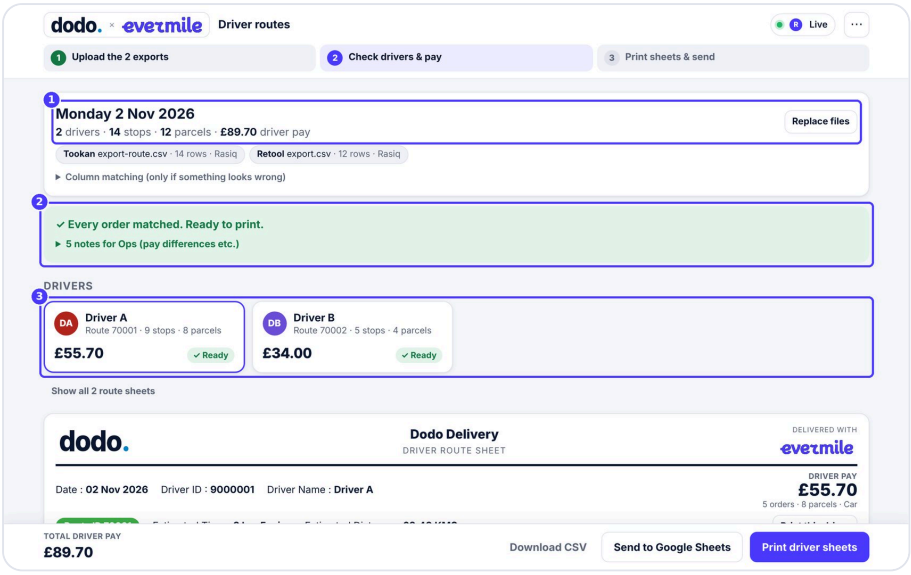

After the first file: its box turns green ✓.

Dropped it in the wrong box?
No problem. The tool recognises the file and moves it to the right box by itself.

Teammate already uploaded?
Then you don't need to. Their files appear on your screen automatically.

2 Read the coloured box

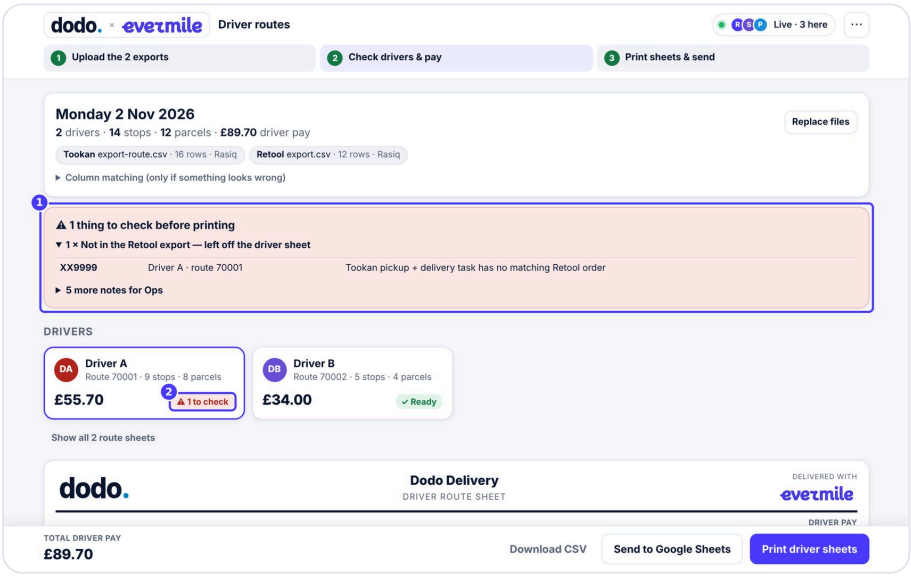

This is the most important step. It takes 5 seconds.

① the day in one line (drivers, stops, parcels, total pay) · ② the coloured check box · ③ one tile per driver

✓ GREEN: "Every order matched. Ready to print."

Everything is fine. Go to the next step. (The "notes for Ops" link underneath is only for pay checks. You can ignore it.)

① the red box lists exactly what's wrong · ② the driver affected shows "⚠ to check"

⚠ RED: "... things to check before printing"

Don't print yet. Look at the list and use the table on the next page.

2 Red box? Here's what each message means

Find the message, do the fix, then re-upload the file.

THE BOX SAYS	WHAT IT MEANS	WHAT YOU DO
Not in the Retool export, left off the driver sheet	Tookan has this order, Retool doesn't. **The stop is missing from the driver's sheet.**	Download a fresh Retool export (the order may be new) and drop it in again. Still missing? Tell Ops before printing.
Different driver in Tookan and Retool	The order is assigned to two different drivers.	Check who really has it and fix it in Tookan or Retool, then re-export.
Cancelled in Retool	The order was cancelled but is still on the route.	Ask Ops whether the driver should still go there.
No price and no miles	The tool can't work out the pay for this order.	Tell Ops. They can add an amount in **Adjust pay**.

Grey "notes for Ops" (not urgent)

NOTE	MEANING
Retool price differs from the Dodo card	Pay comes from Retool. This is just for Ops to double-check. Nothing to do.
No DP cost in Retool (card rate used)	Retool had no price, so the standard Dodo rate was used.
Only a pickup or only a delivery	Tookan has just one of the two tasks for that order. Usually fine.

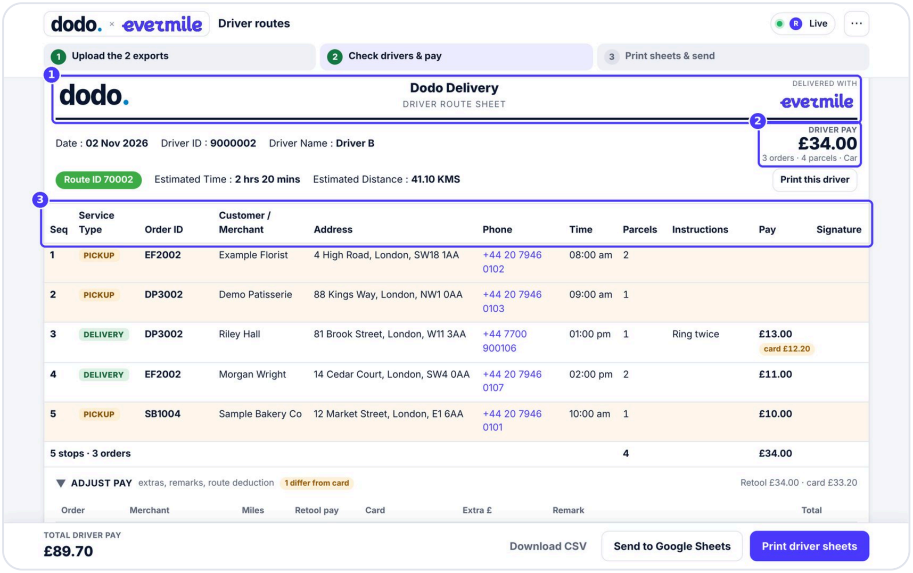

Re-uploading a file

Click **Replace files** (top right of the summary) and drop the new file on its box. Replacing the **Tookan** file clears extras and remarks, so add those last.

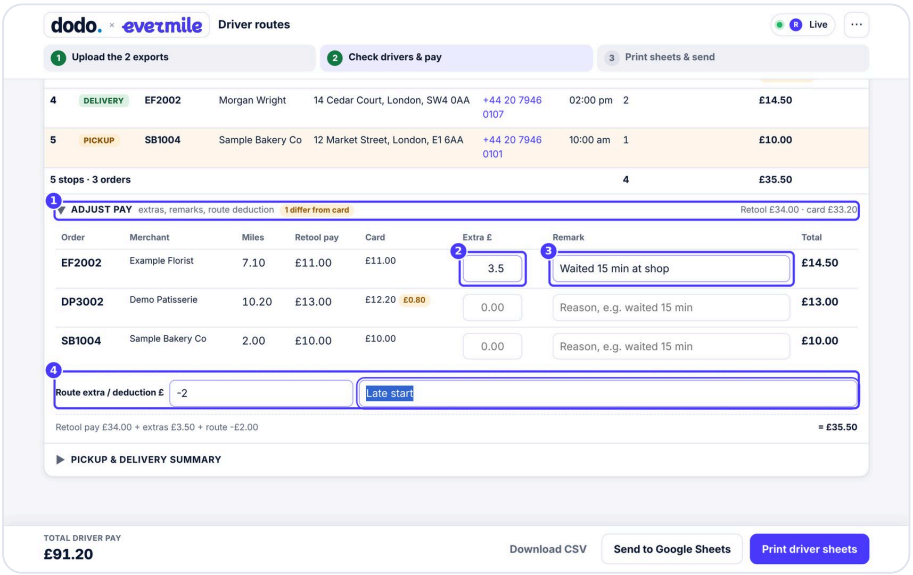

3 Look at a driver and add extras

Only if someone waited, paid for parking, started late, etc.

1. Click a **driver tile**. Their route sheet opens underneath, exactly as the driver will see it.
2. Scroll down to **Adjust pay** (it may already be open).
3. For one order: type the £ in **Extra £**, then the reason in **Remark**.
4. For the whole route: use **Route extra / deduction £**. Type `-2` to take £2 off, `5` to add £5. Always add a reason.
5. Click anywhere else. The driver's pay updates straight away, for the whole team.

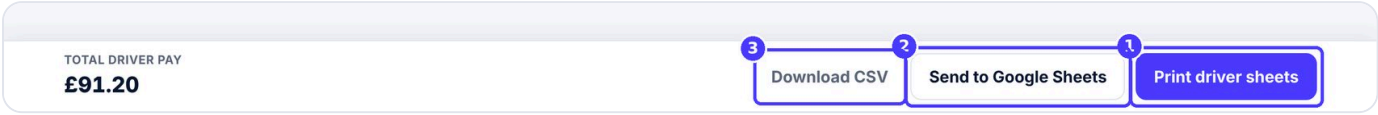

① Dodo × Evermile header · ② the driver's total pay · ③ the stops, in Tookan order

① Adjust pay · ② extra £ for one order · ③ the reason · ④ route extra or deduction (minus = deduction) with a reason

4 Print the driver sheets (one PDF)

One file with every driver, each on their own page.

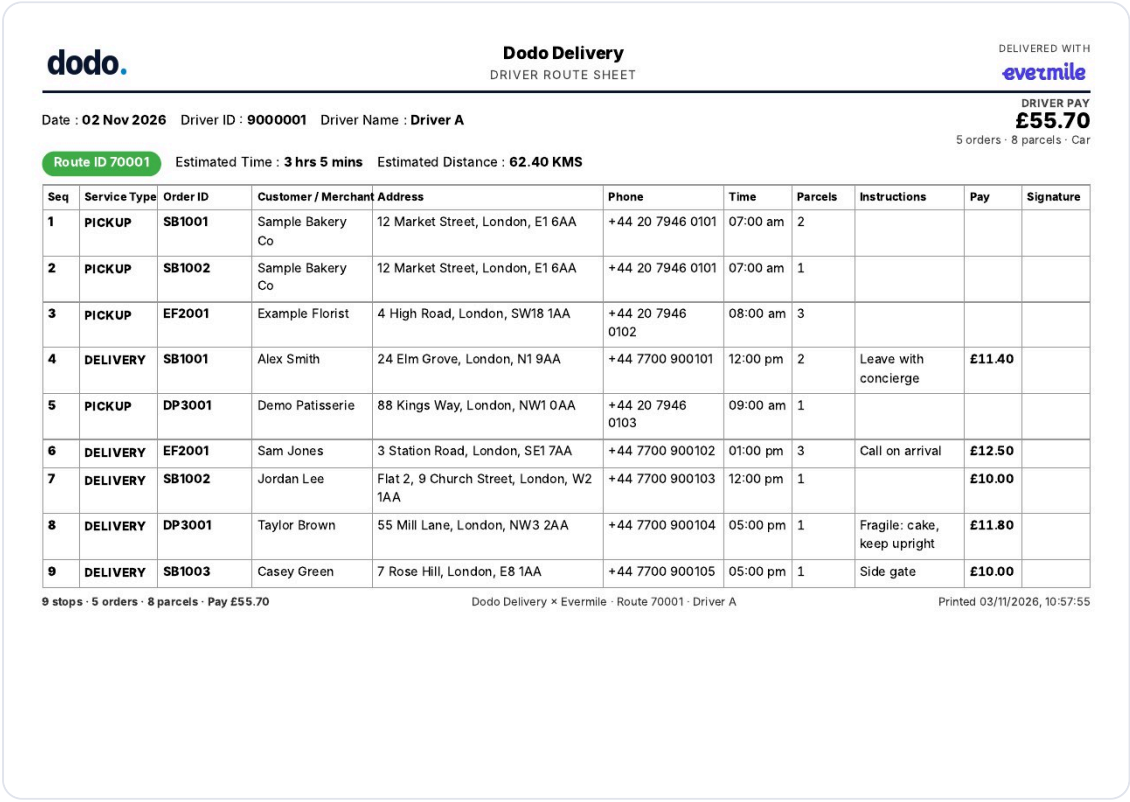

The bar at the bottom: ① **Print driver sheets** · ② Send to Google Sheets · ③ Download CSV

1. Press **Print driver sheets**.
2. In the print window, set **Destination** to **Save as PDF**.
3. Open **More settings** and **untick "Headers and footers"** (removes the web address from the page).
4. Press **Save**. Name it like *Dodo routes 02-Nov-2026.pdf*.
5. Send each driver their page, or the whole PDF, as usual.

Just one driver?

Open their sheet and press **Print this driver**. You get only their pages.

dodo.

Dodo Delivery
DRIVER ROUTE SHEET

DELIVERED WITH evermile

Date : **02 Nov 2026** Driver ID : **9000001** Driver Name : **Driver A**

DRIVER PAY **£55.70**
5 orders · 8 parcels · Car

Route ID 70001 Estimated Time : **3 hrs 5 mins** Estimated Distance : **62.40 KMS**

9	DELIVERY	SB1003	Casey Green	7 Rose Hill, London, E8 1AA	+44 7700 900105	05:00 pm	1	Side gate	£10.00	

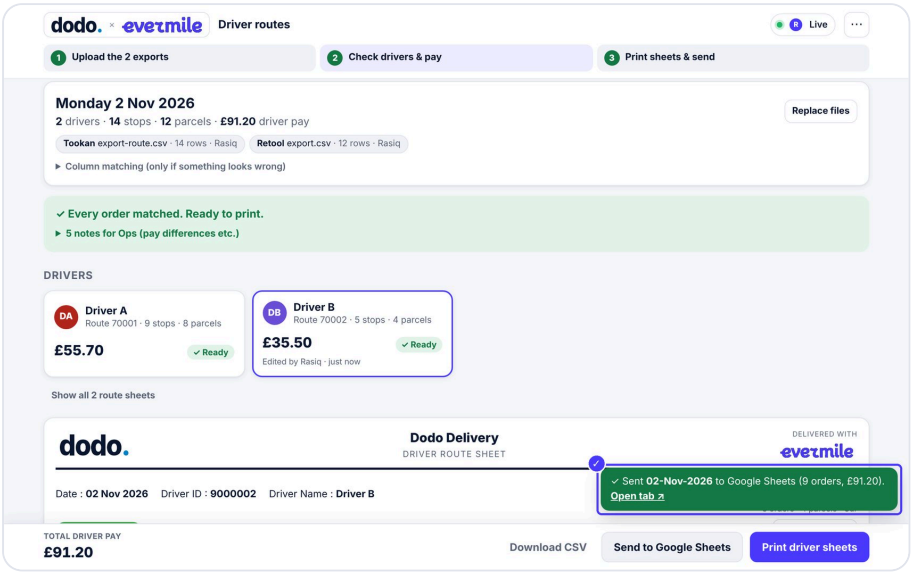

9 stops · 5 orders · 8 parcels · Pay £55.70 Dodo Delivery × Evermile · Route 70001 · Driver A Printed 03/11/2026, 10:57:55

What a printed page looks like: Dodo logo, "Delivered with Evermile", stops in order, parcels, instructions, pay and a signature column.

5 Send the day to Google Sheets

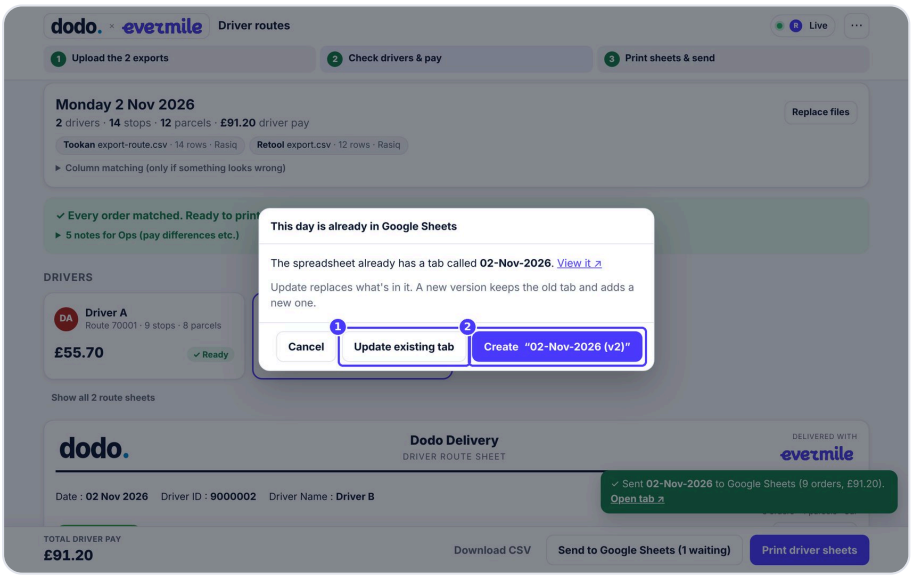

Saves everything to the Dodo Routes spreadsheet, in the weekly-sheet format.

1. Press **Send to Google Sheets**.
2. A green message says **"✓ Sent 02-Nov-2026 to Google Sheets"**. Click **Open tab ↗** to see it.

✓ the success message with the link to the new tab

Sent it before? It will ask you

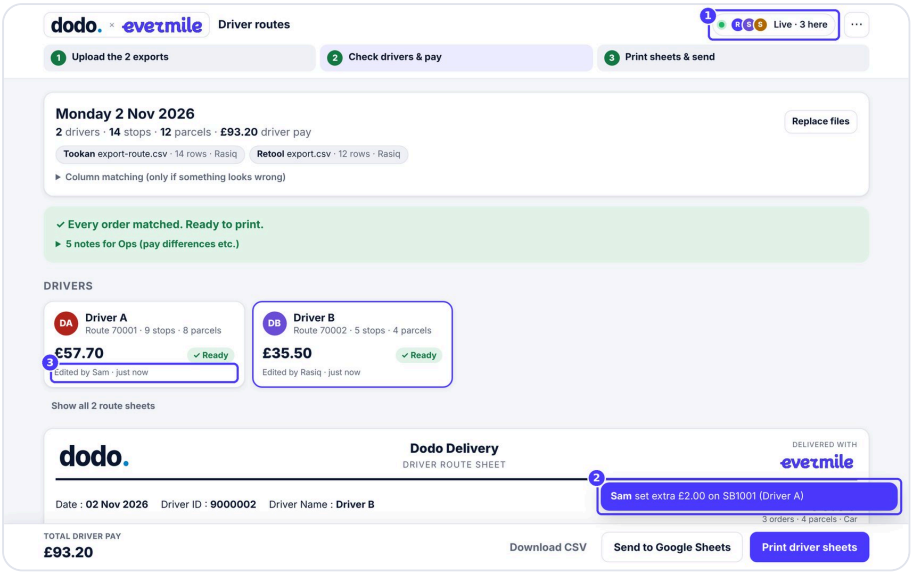

① **Update existing tab**: replaces it with the new numbers (use this for corrections) · ② **Create a new version**: keeps the old tab and adds "(v2)"

No internet?

Press it anyway. The button shows **"(1 waiting)"** and it sends by itself when the internet is back.

6 Working together (2–3 people)

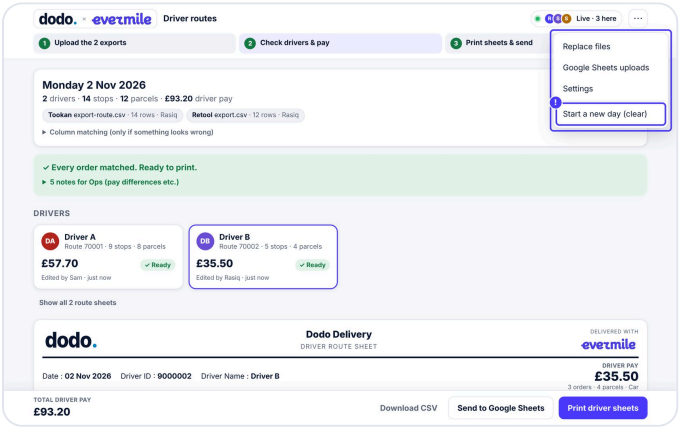

Everyone sees the same screen. Changes appear for everyone within a few seconds.

① who's online ("Live · 3 here") · ② a note when someone changes something · ③ the driver tile shows who edited it last

- Only **one person** needs to upload the files. Everyone else just opens the link.
- Two people can edit **different** drivers or orders at the same time. Nothing gets overwritten.
- If two people change the **same box**, the **last** change wins for everyone. Agree who does which drivers.
- Lost internet? Keep working. The top right says **"Offline · 1 to sync"** and your changes upload when you're back.

End of the day

The ⋯ menu (top right) → **Start a new day (clear)**

> **⚠ Start a new day clears it for EVERYONE**
> Only the last person, after the sheets are printed and sent to Google Sheets, should press it. Tomorrow, just upload the new files. That also starts fresh.

Something's not right?

Try these before asking for help.

WHAT YOU SEE	DO THIS
The page looks old or different from this guide	Press **Ctrl** + **Shift** + **R** (Mac: **Cmd** + **Shift** + **R**) to refresh properly.
Top right says **Can't reach team** or the dot is red	Check your Wi-Fi, then refresh. Your work is saved on your laptop meanwhile.
"...has no data rows" or "Couldn't tell which export..."	Wrong or empty file. Download the CSV again from Tookan or Retool.
A driver is missing	Their route isn't in the Tookan file, or none of their orders are in Retool. Re-export both.
A stop is missing on a driver's sheet	Look at the red box: it's listed under "Not in the Retool export". Re-export Retool.
Pay looks wrong	Open **Adjust pay** for that driver: it shows the Retool price per order. Check extras and the route deduction.
Print shows the web address at the top	In the print window: More settings → untick **Headers and footers**.
"Send to Google Sheets" says waiting	No internet. It sends by itself when you're back online.
Anything else	Take a screenshot and send it to Rasiq on Slack.

Words used in the tool

Route	One driver's list of stops for the day (has a Route ID).
Pickup / Delivery	Pickup = collect from the shop. Delivery = drop at the customer.
DP cost	What Retool says we pay the driver for an order. Driver pay = the total of these.
Dodo card	The backup rate (£8 + 40p a mile, minimum £10). Only used when Retool has no price.
Extra / Deduction	Money added to or taken off a driver's pay, always with a reason.
